

Attention Contractors:

Security has become a major concern for our nation, particularly in the transportation industry. Companies and individuals who transport our nation's goods can be targets for terrorism because of their access to the railroad's shipments and property. It is imperative for contractors to be thoroughly screened and trained in security measures. It is here, in the railroad industry, that new measures must be taken to ensure the safety of all involved—from railroad personnel to railroad contractors.

Ensuring the trustworthiness of your employees crosses boundaries from your own company to those of the railroads you serve and the country we live in. Not only must you consider the potential problems of theft and accidents, you must also be aware of potential terrorist threats. People may infiltrate your company to gain access to the railroad property.

But with this heightened alert comes a trusted partner to help.

e-VERIFILE.COM, an innovative risk assessment and employee solutions company, is leading the way to safety. The new e-RAILSAFE program was created specifically for railroad contractors.

e-RAILSAFE will provide you with investigations on current and potential employees' criminal backgrounds, in addition your employees will receive security training along with ID Badges.

e-RAILSAFE is a one-stop shop for railroad safety. With one flat fee of \$37 for denied employees and \$50 for approved employees, e-RAILSAFE can help you protect your business and our nation, while keeping you in compliance with railroad standards all for just one low flat fee.

(There is a one time set-up fee of \$99.00 to gain access.)

Overview

The e-RAILSAFE program coordinates contractors, contractees (employees of BNSF contractors), and BNSF Railway, by providing the missing link in security and communication.

BNSF starts the process by notifying their contractors of their new requirements to perform the following through e-RAILSAFE:

- Run Background Investigations
- Receive Security Awareness Training
- Issue ID badges to all employees dealing with their respective railroad clients

Contractors sign up for the e-RAILSAFE program by creating accounts through www.e-railsafe.com. Through this system, contractors will have the ability to add employees, upload photos, order badges, and track status on all orders.

Contractees are then responsible for filling in their personal information, and taking the security awareness training. This training will prepare individuals to react in the correct manner when dealing with situations like finding a suspicious package and other safety issues.

e-RAILSAFE takes over next, automatically running background checks and printing or denying badges (based on railroad standards). Completing the circle, e-RAILSAFE sends the badges to the contractor.

BNSF has the right to audit each contractor in this process, ensuring that those on their property have completed the necessary requirements. With this program, everyone can be on the same page, an essential step towards making our railroads more safe and secure.

e-RAILSAFE Includes...

Employee Training

Security awareness training

- Provides test and training employees must receive to obtain a badge
- Meets BNSF's criteria

Benefits

- May save your company time and money by leveraging the purchasing power of the railroads.
- Ensures compliance with RR standards

Criminal Background Investigation

Extended Nationwide, Multi-Country Criminal Record Search Using Seven-Year Address History

- Accesses over 3,000 court researchers to physically go to courthouses and search for records on your applicant/employee
- Checks all felony and misdemeanor records at the county seat

Benefits

- Protects your business and reputation with legal information on your applicants/employees
- Ensures compliance with RR standards

"All of this ensures compliance with railroad standards"

Photo ID

Employee badges

- Includes name, photo, address and the numbers of the railroads that grant authorization
- Must remain visible when working on railroad property

Benefits

- Allows contractors to identify employees
- Ensures compliance with RR standards

Additional Benefits

Employee Management System

- Stores all employee/applicant files, photos, and other information electronically

Benefits

- Streamlines employee tracking
- Provides on-line training for your employees
- Increases security
- Internet based
- One Stop Shop for all screening needs

e-VERIFILE collaborated with BNSF and other railroads to create e-RAILSAFE specifically to ease the process of railroad compliance. Along with e-RAILSAFE, we offer a host of other helpful products with customization options.

e-VERIFILE's goal is to provide e-commerce solutions facilitating the secure purchase and delivery of consumer or business-related information and or products over the internet.

Other products include:

- **DOT Verification**
If your employees fall under the guidelines of the DOT, then this report will make sure you are in compliance by doing the DOT Employment Verifications for you.
- **Credit Investigations**
Along with top-of-the-line criminal searches, e-VERIFILE offers investigations into credit history, which is vital information for those dealing with company assets.
- **Motor Vehicle Reports**
Every time an employee starts a car on company time, the employee and company are liable. To safeguard you, e-VERIFILE provides accurate assessments of a subject's driving record.
- **Personal History Verification**
Is what your applicant saying true? e-VERIFILE offers verification of application information, such as employment, education, and professional license verification.

"We are committed to building long-term relationships with our clients"
