MATERIAL REQUIRED

Per Car

1. 12 D-3 Inner Springs.
2. WABCOPAC to WABCOPAC-II Brake System Conversion.
PROCEDURE:

1. Work cars in accordance with BNSF General Shop Specifications and also the Supplemental Specification for Bulkhead Flat cars.

2. Ensure side sill reinforcement has been applied in accordance with BN DWG 107170.

3. Add three (3) D-3 Inners to each spring nest to a 7 D-3 outer & 7 D-3 inner configuration.

4. Update spring configuration stencil on the ends of the car to reflect 7 D-3 Outer and 7 D-3 Inner.

5. Apply WABCOPAC-II Brake System in accordance with WABTEC instructions.

6. Modify A-End ¾-inch cylinder pipe to obtain proper equalization pressure (63.5-65.5 psi).

7. Stencil the letters “EXS” in the consolidated stencil to the right of the built date in 1-inch block letters to indicate that the car has Extended Service Status.

8. Update Field 65 in UMLER to reflect Extended Service (Enter code “C” for approved for extended service).

9. Enter Job Number B-713 in Shop Release Program.

Questions or comments should be directed to the BNSF Mechanical Engineering Department at 817-352-1469

Mr. Scott Landrum
Transportation Technology Services
1540 Edinburgh Lane
Keller, TX 76248

Dear Mr. Landrum:

I am pleased to advise that our review process is complete on the subject group of cars, which was submitted in your letter of August 14, 2002. These cars are therefore approved for Extended Service Status under Office Manual Rule 88.C.l.f. (1) (c with the understanding that any repairs, modifications or upgrades required by the Minimum Mechanical Standards Chart of Paragraph C.3 of Rule 88 will be performed on each car.

Please see that the necessary information changes are provided to UMLER as these cars are reconditioned and released. If you have any questions please do not hesitate to contact Mr. Charles Powell of our Transportation Technology Center, Inc. subsidiary at (719) 585-1883.

Sincerely,

Thomas J. Stahura
